

event security

When holding a function or event, the last thing you need is for anything to get out of control, you can rely on Titanium Security Australia's event security services to protect the people, assets and property. With an extensive history in event security, our Crowd Controllers are trained to manage all potential situations, professionally and responsibly, with the client and their interests as our absolute number one priority.

Event Security is an integral component that must be taken into consideration by Organisers of an event. Event Security personnel are licensed Security Agents that have 'Crowd Control' endorsement and Responsible Service of Alcohol Certification. The primary role of Event Security personnel is to prevent incidents and criminal behaviour before it occurs. Secondary to prevention, Event Security personnel will also protect your staff, guests in attendance, your premises and your assets e.g. cash register/ takings. A licensed security presence at your event may even be required by law, it is best to consult with the Liquor Licensing commission in regards to your obligations.

Examples of occasions that benefit from a professional security presence include:

- Community events
- Private Celebrations
- Music festivals & concerts
- Sporting events
- Street parties
- Conventions
- Exhibitions & shows
- Corporate functions
- Store openings
- Birthday parties

Titanium Security Australia's Event Security Division is able to provide as little as one Crowd Controller for a birthday party, all the way up to several thousand Crowd Controllers for a large-scale public event. We have professional Crowd Controllers available across South Australia 24/7, every day of the year. Titanium Security Australia's Event Security Division is available to service the security requirements that arise when holding medium to large scale functions and events.

“We had an estimated 10,000 attendees at the Vegan Festival. We really appreciated the professionalism of your staff at our event. Please pass on our special thanks to your Event Security staff for all of their hard work and good humour during the day and to yourself for your support and advice throughout the process.”

Lea and Grace
Vegan Festival
Adelaide

event security

Our Crowd Controllers understand the importance of important presentation and are able to integrate themselves well into the crowd so as to maintain a friendly presence whilst ensuring the physical security of the people, property and premises is diligently maintained. We understand that our security personnel are often the first people seen when entering an event. Image, professionalism, and real industry experience are essential. On the flip-side, our Crowd Controllers are also trained to handle circumstances involving large crowds, alcohol, illicit drugs and violence. They are trained to handle potentially dangerous situations professionally and respectfully.

In addition to preventing, deterring and detecting incident that may compromise the safety and security of your event, Titanium Security Australia's Event Security personnel also deliver exceptional customer service by greeting guests and assisting with their enquiries, noting safety hazards and acting to disengage them, compiling incident reports, liaising with police and liquor licensing and escorting staff and guests to their vehicle or taxi.

We can organise everything:

- Two-way radios
- Crowd control log book
- Incident reports
- Wristbands
- Walk through metal detector & wands

"The event was far more successful than even we envisaged and so next year we will be booking more guards, but it was very illuminating to see guards of such exemplary performance in attendance and I was not shy in telling the Mayor and all my Council colleagues."

Mark Basham
PAE Indian Australian Association
